### The best way.

The railroad company have given bligs to finish the grade to a point within a grades of town. That gives them room to figure on depot grounds. and other advantages.

have valed wisi no Could, in good time will be business. get around to as; but it would be better for all concerned if they would strain a point and give us absolute e stainty in place of a position which some conserne into ancertainty. With those who have had experience with the A. T. & S. F. Riv. company, there is no question but what they will establish the depot at the point most convenient to the citizens of the town. But there are many others' filled with prophecy, who base a thousand doubts and conjectures upon the slightest pretexts. Even these baseless suppositions are amply sufficient to prevent men with means from investing in lands and going foward with buildings until they know certain. There are but few houses in town for rent suitable for family residence; and where the depet would be, would Friday, 2° above. commerce at once to erect siich buildings. There are others who would houses. Thus everybody remains idle; waiting for this luformation at a great detriment to trade and im-

up the matter, let the contracts to the put on the force who will, town and secure their lands for depot grounds. If the latter is what they desire they need not stop short six miles from town. Just cay where and how much, and they can have the land; only say it quick and let us be done with uncertainty. If they want money however they will lose more by delay than the town can afford to give. Establish the depot and a town will be built, trade center here with such rapidity, and a carrying traffic demanded that will greatly exceed in money value the amount that can be squeezed out of the town by a pedfiling policy. Hurry up the grade and fix the depot is the best plan for all concerned.
